Portfolio

Summary

Experienced software developer with hands-on expertise building end-to-end systems using React, Next.js, Node.js, Express, MongoDB, and MySQL, with additional experience in AI, LLMs, and vector search.

Technical Skills

Languages: JavaScript (ES6+), Python, Java

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express, REST APIs

AI/ML: PyTorch, TensorFlow

Databases: MongoDB, MySQL, Qdrant (vector database)

Tools: Git, GitHub, Postman

Experience

Indian Air Force

Jan 2025 – May 2026

Software Engineer Intern

Gwalior, India

- Developed scalable training management systems using Node.js, MongoDB, and RESTful APIs, streamlining training workflows and improving operational efficiency by 46%.
- Designed and implemented backend services, database workflows, and API integrations to support efficient management of training-related data and processes.
- Created user-facing graphics, visual assets, and presentation materials to improve the clarity and effectiveness of training systems and project demonstrations.
- Received **Category A Project Recognition**, the highest internal project grade, for the quality, impact, and successful implementation of the developed solution.
- Presented the project and its outcomes to senior defence officials, demonstrating the solution's technical capabilities and operational impact.

Projects

DEX — AI-Enabled Multi-Database Client

July 2025 – April 2026

Full-Stack Developer

- Built a multi-database client in Next.js and Node.js supporting unified connections to MySQL and MongoDB via a plugin-based connector architecture.
- Integrated a local open-source LLM to translate natural-language prompts into optimized SQL/NoSQL queries, with schema-aware context injection to improve query accuracy.
- Implemented query result caching, connection pooling, and role-based access control to handle concurrent multi-database sessions reliably.
- Designed a query editor with syntax highlighting, execution history, and rollback support, streamlining query creation and execution for common database operations.

Education

Madhav Institute of Technology and Science

Sep 2024 – June 2028

B.Tech in Computer Science — CGPA: 8.67/10 (86.7%)

Gwalior, India
